

KennelPro

Kennel management software designed by breeders for breeders

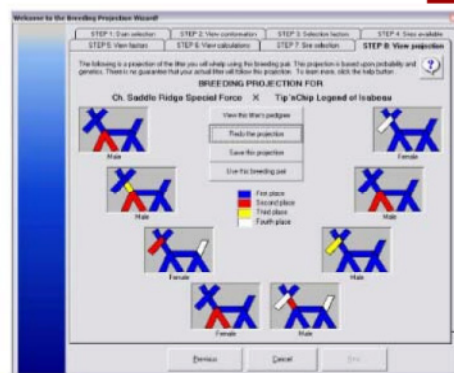

KennelPro provides breeders with a rich set of tools that makes storing, retrieving, and analyzing information easy and fun.

Breeders can store and assess horizontal pedigrees, build vertical pedigrees, and calculate in-breeding coefficients to help you better plan your next breeding.

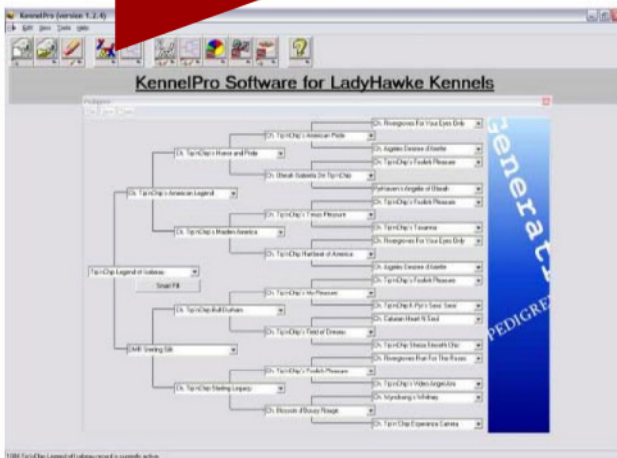

Use all the information you have stored in KennelPro's robust database to complete the **Breeding Projection Wizard** to help you choose the best sire for your dam and even predict a virtual litter.

With KennelPro you can easily create HTML reports to quickly share information with others.

**FREE
OFFER**

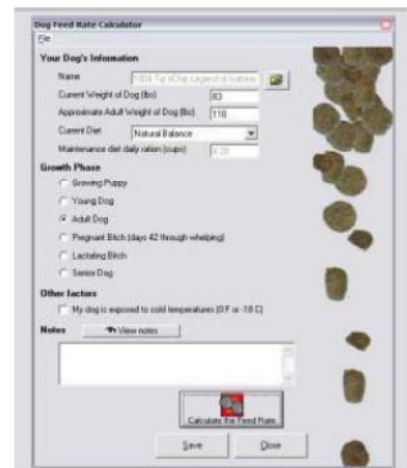

Download your free copy today by visiting <http://www.sdk-weber.com/shop>

Manage the nutrition of your kennel using the Feed Calculator tool.

Store all your dog's health records for quick and easy referral.

Track your bitch's heat cycles and let KennelPro estimate the date of her next season.
