

HydroDog

The All Natural *Electrolyte* Drink!
Aids Hydration, Nutrition, Fitness & Performance

HydroDog Will Make A Difference!
Your Dog Will Feel The Difference!
You Will See The Difference!

HydroDog, developed by Hydro Laboratories, Scottsdale, Arizona is **The All Natural *Electrolyte* Drink!** -- that aids hydration, nutrition, fitness and performance. **No ordinary water!** It is purified (10 Step Super Purification Process) water with electrolytes added -- calcium, potassium and magnesium -- just electrolytes -- nothing else! **HydroDog is completely natural and clear -- no sugar, no sodium, no coloring, no flavoring, no fat, no calories, no preservatives.** It rehydrates, replenishes, revives, recharges, refreshes and refuels a dog's system (also horses; cats; birds; hamsters, gerbils, other pocket pets and small animals; reptiles).

HydroDog is veterinarian tested and endorsed. It is a scientifically formulated combination of calcium, potassium and magnesium. These essential minerals, which facilitate the hydration process, are needed by a dog's system for proper hydration. Electrolytes enable the water to enter a dog's cells more quickly, thereby hydrating and rehydrating faster than ordinary water.

Strenuous activity, physical exertion, high stress levels and many other situations deplete the electrolytes and can leave a dog dehydrated. Dehydration can have serious consequences. The lost fluids and electrolytes have to be replaced to maintain health, proper hydration and performance. **HydroDog** promotes hydration to refuel working muscles -- replenishes trace minerals lost through daily activity, exercise, sports, competition, field trials, hunting, hard work, humid climate, stress, heat stress, travel stress, anxiety, injury, illness and surgery.

Feeding electrolytes daily helps to maintain the dog's hydration and mineral balance. HydroDog is not a novelty, nor a gimmick -- it's an effective performance product. HydroDog is a solution based product with many benefits.

HydroDog is "Simply The Best Drink In Dogdom" for canine athletes in all sports, conformation dogs, obedience dogs, hunting dogs, water dogs, sporting dogs, working dogs, herding dogs, tracking dogs, sled dogs, therapy/service dogs, law enforcement dogs, search and rescue/recovery dogs -- performance and active dogs of all kinds -- even the household active companion "best friend" that goes for a walk, hike, swim, camping or chases after a favorite toy.

Proper hydration will make a difference for canine athletes at all levels of competition. **HydroDog** will unleash their full potential and significantly enhance their performance by giving the dog more stamina, longer endurance, quicker response and faster recovery. **Delays fatigue -- boosts mental alertness -- extends performance.** No matter what the sport, **HydroDog** will help the canine athlete run faster, leap higher, go harder, go longer! Canine athletes, like human athletes, lose electrolytes during periods of intense exercise and competition. Human athletes have used electrolyte drinks, like Gatorade, to prevent dehydration, for rehydration and to restore energy for years. Human sports drinks are flavored, contain sodium and have complex sugars -- are unhealthy and are not recommended for animal consumption. **HydroDog**, the healthy alternative, provides the same benefits to animals. *For maximum effectiveness, we suggest using **HydroDog** every day. If you don't give your canine athlete **HydroDog** daily, then for best results -- **HydroDog** should be used before (starting 48 hours before), during and after strenuous activity and competition.* **HydroDog helps make champions! HydroDog keeps them at their peak! HydroDog is the competitive edge the canine athlete needs and deserves!**

Breeders use **HydroDog** to keep the whelping and later the lactating bitch and her nursing puppies well hydrated.

Boarding kennels use **HydroDog** to keep dogs well hydrated. It's a stressful situation for the dog to be separated (Separation Anxiety) from the family. Dogs tend to drink less when they are stressed out.

Travel (auto, plane, etc.) can create stress. Again, dogs tend to drink less when traveling. **HydroDog** should be used to keep them well hydrated. Suggestion -- most dogs love to chew on ice cubes -- use **HydroDog** to make the ice cubes.

The hospitality industry is welcoming and making accommodations for dogs. People traveling with their dog(s) is steadily increasing -- the number of pet friendly hotels, motels, resorts, B&Bs and other properties are increasing also. Upon arrival, the canine guest is presented with a "welcome" basket containing treats and a bottle of **HydroDog**. The room's mini bar and the hotel's gift shop offer **HydroDog** for sale.

Veterinarians recommend **HydroDog** to maintain proper hydration during injury rehab, illness recovery and postoperative recovery. Recovering dogs benefit from proper hydration and it speeds recovery.

Use **HydroDog** at the first signs of diarrhea and vomiting to quickly replace lost fluids to help reduce the risk of dehydration.

HydroDog benefits dogs of all breeds, sizes and ages -- puppies to seniors. Older dogs tend to drink less making fluid intake and proper hydration a concern.

HydroDog is not a treat -- it's an everyday necessity for optimal hydration and good health. Nothing is more critical to a dog's health and vitality than proper hydration. The most important ingredient for a dog's overall good health is water. It is important to provide a dog plenty of water, but it is also important to keep a dog's electrolytes balanced. **HydroDog** gives your dog the electrolytes that tap water can't. *Water, just water, is not sufficient!* **HydroDog ensures your dog benefits beyond just basic daily water requirements.**

Dogs need to be kept well hydrated in all types of weather -- extreme cold to extreme heat and everything in between. ***HydroDog** is the very best way to provide daily drinking water and keep all dogs well hydrated -- it makes daily water requirements simple, easy and convenient -- ready to use -- no mixing (always consistent because it is mixed at the bottling plant). For maximum effectiveness, **HydroDog** should be used full strength, right out of the bottle, as a direct primary source for all daily water requirements to maintain complete and proper hydration -- can be used as a supplement also. It prevents dehydration. It maintains hydration. It speeds rehydration.* A dog should not have to be a canine athlete, a performance dog, a working dog or a sick dog to get the best hydration possible -- it's for all dogs!

Animal Wellness Magazine awarded **HydroDog** its "Approved Product" seal. The seal appears on the bottle label and in all **HydroDog** marketing and advertising.

HydroDog is available at pet specialty stores that carry other high quality brands and veterinarians, in a one liter bottle with a sport top. Dogs love to drink from the sport top. Suggested retail -- \$3.00 per bottle.
